

This is an excerpt from the assessment that you can find to the discipline on: fisadisciplina.ase.ro

For the discipline Technologies for e-Business in the University year 2016-2017

10. Assessment

Activity	Assessment criteria	Assessment methods	Percentage in the final grade
10.1. S(S)	Involvement and preparation for seminar classes	Recording frequency, interaction in	20.00
10.2. S(S)	Creating group and individual project	Assessing projects' compliance with	20.00
10.3. Final assessment	Written exam with multiple choice questions	Scoring each correct answer and	60.00
10.4. Grading scale	Whole notes 1-10		
10.5. Minimum performance standard	Define and implement appropriate tools to model and manage the online subdivision of the organization/enterprise Interpretation of standard languages for defining web documents		

I request to students to include the work we do together to the CD on which they give me the project so that the frequency will be 10 and for the project: 20 for the personal website and 10 for the seminar work. In that way I offer the possibility for the students that cannot attend to obtain 10 points for practice.

The students that do not give a project can give to me and support at the end of the exam. The points you see includes the default. The Ready Reckoner is to have a standard to check all in the same conditions.

Without a project you lose all the above listed points.

If the number of points obtained by adding the evaluations numbers is greater than or equal to 5 you pass the exam.
